AVRO AIRCRAFT AND COLD WAR AVIATION

By Whitcomb, Randall

Vanwell Publishing, Book Condition: BRAND NEW. BRAND NEW Oversized Hardcover in Dust Jacket (Protected in a New Brodart Jacket Cover) - Stated 1st Edition Printing - Overseas Shipping Extra Due to Size - 272pp - This book is definitely not another rehash of old Avro Arrow material! It covers the entire history of Avro Canada, includes much about Avro in Britain and about advanced aviation progress in the United States. Its sub-plots involve the aerospace race of the 20th century set in global political aspects. The reader will discover the exciting advances in aviation over the last century and be able to assess the impact of the Avro story as a result. Statistical comparisons of Avro’s products to the benchmark products of the American competition provide the most shocking evidence of how advanced the Avro actually was. Examines the C-102, CF-100 and the CF-105 Arrow interceptor through exceptionally detailed technical and aerodynamic discussions, and the political and economic factors at work in the demise of the Arrow. Most particularly the author focuses on the staggering front-line achievements of the A.V. Roe Company, later Avro Canada Ltd. His own stunning artwork illustrates the book A Brand New Quality Book from a Full-Time...

Reviews

I actually started out looking at this publication. It was actually written really perfectly and useful. It's been written in an extremely simple way and it is only soon after I finished reading through this pdf by which really modified me, change the way I really believe.

-- Breanna Kerluke

This is an incredible ebook which I actually have ever go through. This can be for those who state that there had not been a really worth reading. I am just quickly can get a delight of reading a published book.

-- Ms. Colleen Ziemann V

Aircraft manufacturer A.V. Roe and Company (Avro) designed the Vulcan in response to Specification B.35/46. Of the three V bombers produced, the Vulcan was considered the most technically advanced and hence the riskiest option. In the event of transition to war, the V Bomber squadrons were to deploy four aircraft at short notice to each of 26 pre-prepared dispersal airfields around the United Kingdom. In the early 1960s the RAF ordered 20 Beagle Basset communication aircraft to move the crews to dispersal airfields; the importance of these aircraft was only brief, diminishing when the primary nuclear deterrent switched to the Royal Navy's Polaris Missile.

Suddenly February 20, 1959, Prime Minister John Diefenbaker stood in the house of commons and announced that the Arrow and Iroquois projects were canceled. This immediately put over 50,000 people out of work at the plants and outside suppliers. The year was 1952 and the cold war was at full chill. Joe McCarthy's Un-American Activities Committee was looking for reds under beds, and UFO sightings were spreading like an epidemic across the United States. Even air-force pilots reported being pursued by flying saucers.
