Sailor & Death Park

Maria Fusco

Abstract

Animals have become the focus of much recent art, informing numerous works and projects featured at major exhibitions including dOCUMENTA (13) (2013), the 10th Shanghai Biennale (2014), and the 56th Venice Biennale (2015). Contemporary art has emerged as a privileged terrain for exploring interspecies relationships, providing the conditions for diverse disciplines and theoretical positions to engage with animal behavior and consciousness. This interest in animal nature reflects a number of current issues. Observations of empathy among nonhumans prompt reconsiderations of the human. The nonverbal communication of animals has been compared with poetic expansion of the boundaries of language. And the freedom of animal life in the wild from capitalist subordination is seen as a potential model for reconfiguring society and our relationship to the wider environment. Artists’ engagement with animals also opens up new perspectives on the dynamics of dominance, oppression, and exclusion, with parallels in human society. Animal nature is at the heart of debates on the Anthropocene era and the ecological concerns of scientists, thinkers, and artists alike.
At the south end of Death Valley National Park, Badwater Basin is the lowest point of land in the western hemisphere, at 277 feet below sea level. Needless to say, this area is very hot, even in the winter. Badwater Lake is a shallow lake surrounded by mountains and rimmed with salt, but you may not always see water here. DEATH TRAP. 2002, 2007 by Anthony Ogozalek. PROLOGUE. One year ago, the Tanaka Space Station: Most of the station's staff members were accompanying the main communications room, located in the very heart of the entire complex. "Easy, Sailor Moon!", Sailor Mars comforts to her as best she can. "I know this is hard for you, but please try to pull yourself together! We need you!" "Be strong, Princess!", Sailor Saturn urges her. "R-Right", she says, trying to muster as much confidence as she can. Death Valley National Park is an American national park that straddles the California–Nevada border, east of the Sierra Nevada. The park boundaries include Death Valley, the northern section of Panamint Valley, the southern section of Eureka Valley, and most of Saline Valley. The park occupies an interface zone between the arid Great Basin and Mojave deserts, protecting the northwest corner of the Mojave Desert and its diverse environment of salt-flats, sand dunes, badlands, valleys, canyons, and Sailor Mars comforts to her as best she can. "I know this is hard for you, but please try to pull yourself together! We need you!" "Be strong, Princess!", Sailor Saturn urges her. "R-Right", she says, trying to muster as much confidence as she can. Death Valley National Park is a beautiful national park found in two American States – Nevada and California. This is actually found just east of the Sierra Nevada and is near the Great Basin and Mojave deserts also. The park does have a lot of diverse desert environments of badlands, salt flats, valleys, sand dunes, mountains and canyons. The Death Valley National Park is considered to be an international Biosphere Reserve and almost 95% of the entire park is a wilderness area.
