This article is an update of the April 2013 article. As the previous year, we organized the books by topics; this should help the readers to focus on their interests.

It is unlikely to list all new books in the field; we did our best scouting different resources and websites. The list is also focusing only on books published in the English language and available for purchase (as ebook or in print) at the time of this review (April 2014). Books are listed based on the relevance to the topic and no judgment is made in terms of quality of the content. We let the reader do so.

The journal section signals special issues of interest to Survey Practice readers and is organized in journal news and special issues sections.

Finally, following from last year, we have a thematic section with new books. This time the section is devoted to Big Data, given the interest in the industry.

JOURNALS NEWS AND CALL FOR PAPERS

Volume 29 and forthcoming are available via the new publisher website, while the previous volumes 1–28 are still available on the original JOS website

Political Psychology introduces Advances in Political Psychology. “Given this explosion of information and interest in the field, there is an increasing need for a venue where cumulative research findings are synthesized in a form accessible to the scholar, student, and practitioner. The Advances in Political Psychology annual series is intended to fill this need by publishing capstone papers that
summarize and detail a systematic program of ongoing research on a given topic or theory”.

*Public Opinion Quarterly* welcomes new editors Patricia Moy and Tom W. Smith.

*Social Science Computer Review* increased its frequency from 4 to 6 issues a year from 2013.

*Survey Research Methods* is now indexed by the Social Sciences Citation Index (SSCI).

**JOURNALS SPECIAL ISSUES**

The *Journal of Internet Medical Research* started classifying papers by topics called E-collection. There is an e-collection titled “Internet-based Survey & Research Methodology” of interest for our readership.

*Political Analysis* published a free virtual issue on “Measurement in Political Science”. Available at: [http://www.oxfordjournals.org/our_journals/polana/virtualissue5.html](http://www.oxfordjournals.org/our_journals/polana/virtualissue5.html).
