William Gropp. The Message Passing Interface (MPI) was developed over eighteen years ago and continues to be the preferred programming model for scientific computing. Contributing to that success was a combination of forward-looking features, precise definition, and judgment based on the experience of developers, vendors and users.

The Communications Web site, http://cacm.acm.org, features more than a dozen bloggers in the BLOG@CACM community. In each issue of Communications, we'll publish selected posts or excerpts. twitter Follow us on Twitter at http://twitter.com/blogCACM
