I would be lying if I, as an aspiring Young Adult writer, were to say these conflicts have not affected my world. Questions immediately shot up regarding the fiction project I set out to accomplish for my Masters of Fine Arts thesis, a Young Adult novel featuring two high school seniors and the clash between one’s identity as the school clown and the other’s descent into the football gambling world. Accomplished writers of Grownup Fiction doubted the validity and literary capabilities of a juvenile novel, expressing concerns about whether creative writing of that kind belonged in a graduate program.

When asked about his goal as a writer of Young Adult Literature, Newbery Award-Winning author Christopher Paul Curtis said, “if the novel lets one child see that there is a real potential for beauty and fun and emotion in a book, I’m not greedy, I’ll happily take that” (Carroll 106). And I might add, when asked by a young adult about his goal as a writer of Young Adult Literature, Newbery Award-Winning author Christopher Paul Curtis said, “if the novel lets one child see that there is a real potential for beauty and fun and emotion in a book, I’m not greedy, I’ll happily take that” (Carroll 106). And I might add, “reader,” then his statement would still seem a noble writerly cause.

I can't help but feel transported back to English class, the way the above list showcases the long-heralded elements of quality Literature—Character, Setting, Plot, Conflict, Tone, Voice, and Point of View.

When asked about his goal as a writer of Young Adult Literature, Newbery Award-Winning author Christopher Paul Curtis said, “if the novel lets one child see that there is a real potential for beauty and fun and emotion in a book, I’m not greedy, I’ll happily take that” (Carroll 106). And I might add, “reader,” then his statement would still seem a noble writerly cause.

This led me to choose twelve recent Young Adult novels, a wide variety of books from the past five years (2002–2006), to study as a sampling of Y.A. literature, through which I could analyze what is going on in the “genre” today. My reading list included award winners and new releases, historical and futuristic fiction, single and multiple P.O.V., straight and homosexual relationships, science fiction and fantasy genres, smart kids and mental patients, school lit and high culture, and the outcasts. My hope was to get an up-to-date look at the current trends and decide for myself what makes a Young Adult book any different from its Grownup relatives.

12 Y.A. Novels under the Microscope

Feed by M.T. Anderson (Candelwick, 2002)

Hail the future of America! The moon, the 51st state, is an industrialized wasteland and not too different from Earth. Lesions are developing on people’s skin that turn out to be pretty cool when worn by the right celebrities. The Feed continues to provide the ideal entertainment experience for those who have taken the surgical step of progress. As Titus, a feed-wearing
Critics might argue that this 2006 Newbery Award Winning novel contains too many graphic illustrations to be considered Young Adult. Perhaps they are right. Or perhaps with a graphic

The A-List highlights the high-class battles for teen social status, the dysfunctional family relationships, multiple party scenes, close attention paid to clothing and outward appearance, and the internal struggles for identity, in such a way that this novel does not deserve to be excluded from the company of Young Adult, even if critics cringe at its inclusion.

Bucking the Sarge by Christopher Paul Curtis (Wendy Lamb, 2004)

This humorous story features Luther T. Farrell, a young black boy and freshman in high school, who lives with and works for the Sarge, the dictator mom. With his best friend Sparky, his love for philosophy, and his hatred for Flint, Michigan, Luther gets promoted to head of the Sarge's group home. At the same time, he is trying to find a way to win the school's science fair for the third year in a row and somehow not ruin things with Shayla Patrick, the cute girl who just happens to be his greatest competition.

Working an after-school job like many teens his age, high school freshman Luther T. Farrell helps run the Happy Neighbor Group Home for Men with the Sarge, otherwise known as his mother. This job, the Sarge tells him, is a great way for young black man like himself to work his way out from under the oppressive hand of society. For as tenuous as his home and work relationships are with the Sarge, his school life is just as uncertain. Luther dreams of getting to know Shayla Patrick but balks before taking any steps toward intimacy. The only time they ever seem to meet is at the school's science competition, something Luther has won for two consecutive years, a feat which cannot be good for his chances with her. Luther's friend Sparky tries to get rich quick by consulting with Dontay Gaddy, the flimflam lawyer at 1-800-SUE-EM-ALL, and Luther takes it upon himself to set his friend straight. First jobs, friendship conflicts, girls, school drama, and a little detective work to unravel an enormous secret are what put this ALA-2005 Best of YA novel on the Young Adult map.

The A-List by Zoey Dean 17 31

Welcome to Hollywood 90210, the world of couture, parties, and hot young bucks. Having just flown in to live with her father for the summer, Anna Percy is the new girl in town. Cammie, Sam, and Dee are her problem. There is no way in Neiman Marcus are they going to let the new girl somehow win the love (or lust) of heartthrob Ben Birnbaum. If anyone has a chance at the sort of wishes that money and power cannot buy, it is her, which means there is only one thing to do with a girl like that—make her life miserable.

Boredom is just not possible with A-List members Cammie, Sam, and Dee catfighting with Anna for the rights to Ben Birnbaum. Among the books accused of watering down the Young Adult market, the A-List highlights the high-class battles for teen social status, the dysfunctional family relationships, multiple party scenes, close attention paid to clothing and outward appearance, and the internal struggles for identity, in such a way that this novel does not deserve to be excluded from the company of Young Adult, even if critics cringe at its inclusion.

Prison Break: The Complete First Season, 2006

Criss Cross by Lynne Rae Perkins (Greenwillow, 2005)

Debbie feels there is something more to this life, something she senses when she looks at her mother's old photographs and wonders if the people she sees had things figured out as much as it seems. Her wish for excitement comes true when her parents volunteer her to help with Mrs. Bruning, an elderly woman with fading health and a houseful of all things German.

Critics might argue that this 2006 Newbery Award Winning novel contains too many graphic illustrations to be considered Young Adult. Perhaps they are right. Or perhaps with a graphic
novel such as Gene Luen Yang’s American Born Chinese winning the prestigious Michael L. Printz Award in 2007, Crisis Cross is more on-target than its critics realize.

At a surface level, the multtextual use of lists and song lyrics, haikus and Nancy Drew, and the reading of magazines such as Mad Magazine, Reader’s Digest, and Popular Mechanics help add a teen element. A number of the classics are again mentioned—Emily Bronte’s Wuthering Heights, Frank Baum’s The Wizard of Oz, William Shakespeare’s A Midsummer Night’s Dream, and Hermann Hesse’s Siddhartha. Frequent sections are formatted with experimental purposes in mind—an entire page written in italics to signal a person’s thought process, a chart formatted into columns to separate out two narrative points of view happening simultaneously, and dialogue formatted as if it would be in a play.

At a deeper level, fourteen-year-old Hector’s guitar lessons with Pastor Dan introduce a character’s desire to delve into the arts, a common thread among Young Adult, not to mention its portrayal of a young man’s pursuit of a desired skill under the tutelage of a wise adult. Debbie’s cramped living quarters lead her to the discovery of her mother’s old photo albums, connecting her to family members from the past, allowing her to see when they were happy. Hector’s struggle to pick up on function within the social norms of the dating environment illustrate his awkward transition into adulthood. Debbie’s time spent volunteering to help with the elderly German woman Mrs. Bruning add a multiethnic layer, as well as a young girl’s grappling with a dying woman.

However, Crisis Cross does not feel like a Young Adult novel, its tone and voice more like a midgrade, or children’s book, its tensions, conflicts, and character desires more middle school than high school.

King Dork by Frank Portman (Gelacorte, 2008)

Holden Caufield, step aside for the new king in town: Tom Henderson, great American nobody, Chimo, Hender-Fag, Sheesie, and King Dork. His Hillmont High School life is a combination of disappointments—from his exploits with girls, to his wanna-be band that does not even have a drummer and amps ... or guitars, to his father killed in a hit and run, to his subterranean position on the social totem pole.

The main character, tenth-grader Tom Henderson, is an outcast, a fringe player in the strata of Hillmont High School society. His nicknames are just the first layer of the Young Adult voice that rushes through these pages. The numerous names that he and Sam Hellerman come up with for their rock band that has yet to acquire any instruments or a drummer are as off-the-wall as their characters—Easter Monday, Ray Bradbury’s Love-Camel, The Mordor Ape, The Chi-Moo, and Sentient Beard, to name a few of their twenty-five. When they change band names to the Nancy Wheelers, their first album is entitled Margaret, It’s God, Please Shut Up!, a hilarious twist on the classic Young Adult novel by Judy Blume—Are You There, God? It’s Me, Margaret.

It is Tom’s discovery of a forgotten box of his father’s books, which includes a few of the Classics—John Knowles’ A Separate Peace, and William Golding’s Lord of the Flies—that takes this deep into Young Adult territory. The highlight of the stash is the father’s copy of J.D. Salinger’s Catcher in the Rye from when he was twelve. The copy is scribbled over and spilt on, with secret codes hidden throughout. The mockery of The Catcher cult teachers at school continues during Tom’s detective-like search for some truth about his father as a teenager. From Tom’s sexual explorations with the mysterious fake-mod Fiona, to the scandals in the school administration, to the Intro and Outro chapters, nearly everything about this novel screams Young Adult.

33 Swordfish by Adam Rapp (Candlewick, 2003)

Bobbie, Custis, and Curl are the dark survivors at the fringe of society. What is particularly amazing is the way everything in this depraved world feels so cool and clean through Custis’ eyes. Even through the three of them are on the run from the police because of what Bobbie did to his parents and are looking for a rich family to sell Bobbie’s baby brother to, he holds out hope that his gat, the Skylark, and Curl’s trick money are somehow going to hold their lives together.

When a novel starts out with a line like “On top of everything, Bobbie’s got the clap,” I know I’m in for something unique. Obviously enough, the gripping dialect unique to the different characters was the first thing to grip me. The darkness of these characters’ situation follows close behind. Baby in tow as they flee from the police for murdering their parents, these teens have a rough road ahead. Through the multiple points of view of Custis, Curl, and Bobbie, this narrative plunges the reader into the minds of the most outcast of outcasts.

Rapp does not employ any of the ‘tricks’ that so many of his peers do. He uses the characters’ desire for a place to call home, their unique vantage point on adolescent life, and the utter darkness of their situation to hit the reader with a blizzard of Young Adult hope at the end.

It’s Kind of a Funny Story by Ned Vizzini (Miramax, 2008)

Craig Gilner looks like your everyday modern kid, chiling with Aaron and hoping for something more with Nia, until he sneaks out in the middle of the night and admits himself into a mental hospital. Not until the wild parties, Argeron (mental) Hospital, crazy roommates, Egyptian music, Brain Maps, and the Brooklyn Bridge, does Craig finish his journey from Broken, to Healing, to Normal, to Real, and finally, to Alive.

Nominated to the ALA 2007 Best of Y.A. list, this journey of New York teenager Craig Gilner’s is one of hope in the face of depression and suicide. After the SATs and years of academic labor to get into Manhattan’s Executive Pre-Professional High School, Craig begins to see that he might not make it. This world is not for him. His world includes witty labels for serious things—Tentacles, Cycling, The Shift—alcohol, marijuana and amphetamines, suicide attempts, visits to shrinks, and internal dialogues with the soldier in his stomach that starves him at will. During his stint in Argeron, we see his hyptersensitivity of body when he is with Nia, especially during the third best sex scene of the year according to the Henry Miller Award panel. We see his tendency toward doodling out nicknames—Blue Streaks and Blue Eyes. We see an inventive display of smootapeopolia— FFFFF! Hooooooo-ee!! Bzzzzzzzzzzt! – Himmimmmmmmmmmmmm, – and Waa-taa. Waaatta.

Craig’s story journeys his toward identity, a discovery that he needs to place to call his own, a realization that other people’s labels and expectations on his life may not be the best for him, an awakening to the fact that his family loves him and wants the best for him, no matter what he decides. Craig’s time in the hospital allows him to discover his love for art, and specifically drawing. Along with the other teen elements, the personally-tailored brain maps that he draws for the people around him supply this narrative with a feel that is distinctly Young Adult.

Peeps by Scott Westerfeld (Razor Bill, 2005)

When Cal Thompson moves to New York City and spends the night with Morgan, his desires and passions change forever. He finds out he has been infected by the parasite, but in the worst way. Yes, he is a Peep, or Parasite-Positive, which means he will develop superhuman strength and senses, start to hate the sunlight and everything else he has ever loved, and begin to crave human blood. However, which means he may be able to control his desires, to a point.

This vampire story features a nineteen-year-old protagonist who is forced to locate his progenitor, the girl who gave him the parasite. Their relationship hovers on the edge of romance and business the entire time, as Cal’s detective work brings him ever closer to uncovering the magnitude of New York City’s problem. The voice throughout the narrative goes the furthest towards making this book Young Adult. The first person and past tense allow Cal to get us to feel a bit of his paranoia through the every-other-chapter lessons on parasites. Fast-paced, grippingly action-packed, featuring teen characters and their love lives in light of the parasite, and explaining all vampire myths from the past, this book cannot help but feel like Young Adult.

The Book Thief by Markus Zusak (Knopf, 2006)

Narrated by Death and set in a small town outside Munich during World War II, this is the story of nine-year-old Liesel Meminger, a German girl taken into Hans Huberman’s household as an unwanted child. The copy is scribbled up and spilled on, with secret codes hidden throughout. The mockery of The Catcher cult teachers at school continues during Tom’s detective-like search for some truth about his father as a teenager. From Tom’s sexual explorations with the mysterious fake-mod Fiona, to the scandals in the school administration, to the Intro and Outro chapters, nearly everything about this novel screams Young Adult.

Tying Up the Threads

The question still needs an answer: What characterizes a book as Young Adult? What makes it different from its Children’s or Grownup relatives?

In her book Walking on Water: Reflections on Faith and Art, Madeleine L’Engle says that “a children’s book is any book a child will read.” This approach would mean that a teen’s reading of Plato’s Republic would qualify the philosopher’s writing for membership. Further exploration of this idea would mean that if a Grownup were to pull Crisis Cross off the shelf for reading, it could be claimed as a Grownup novel. This definition seems deficient.
Brown and Stephens say in their book Teaching Young Adult Literature that if a book is written about teens and for teens, then it is Young Adult. This approach might allow critics to say that any of the classics with a teen protagonist belongs to the category. They might also look at “written for teens” and argue that no one can tell for whom a book is written. Marked for Grownups in Australia and Young Adults in the United States, Zusak’s The Book Thief is a prime example. When I talked with Zusak at the 2006 Los Angeles Times Festival of Books, he said that he did not completely understand the marketing strategies, that all he tried to do is write a good book.

Still others have claimed all coming-of-age novels as Young Adult, labeling them various German words: the bildungsroman to tell the story of a protagonist’s growth into adulthood, the kunstlerroman to tell the story of a protagonist’s growth into an artist, and, as Chris Crowe corne, the sportlerroman to tell the story of a protagonist’s growth into an athlete. Despite which German words are used to categorize a novel, not all “romans” can be adopted as Young Adult. James Joyce’s A Portrait of an Artist as a Young Man, a kunstlerroman by definition, obviously does not fit the mold.

Since there does not seem to be a clear definition, please allow me to offer mine. As I see it, the label “Young Adult” refers to a story that tackles the difficult, and oftentimes adult, issues that arise during an adolescent’s journey toward identity, a journey told through a distinctly teen voice that holds the same potential for literary value as its “Grownup” peers.

1. Written About Teens

Out of my twelve Young Adult reading selections, all but Zusak’s Liesel from The Book Thief are teen protagonists. Cal Thompson from Peeps is the oldest at nineteen. While adult characters may play prime roles, it is the adolescent we care most about in these novels. He or she is the one we follow and care for, and in the case of first person narratives, the one whose mind we know and live through.

2. A Distinctly Teen Voice

Eight of these novels are told in the first person, while only four are in the third person. This 67% told in first person is drastically higher than both Grownup and Children’s fiction. Nine of them are in the past tense, with three of them in the present tense. Twenty-five percent may not seem like much, but in my experience, compared to Grownup and Children’s fiction, it is significantly higher.

Statistics aside, the narrative voices of Young Adult novels, especially when in first person, are as unique as the protagonists who embody them. The lingo is modern. The pace, fast. The desires, youthful. The observations, distinctly teen.

3. The Journey toward Identity

Liesel’s developing love for books, words, and writing in The Book Thief, Cal’s grappling with his life as a vampire in Peeps, Paul’s claiming of his sexual self in Boy Meets Boy, the four students striving toward college in Crunch Time—at the heart of all twelve novels lies this journey toward individual identity.

4. Tackling the Adult Issues in Teenage Lives

From the school administrator’s videotaping of minors in King Dork, to the fraudulent finances and rampant litigation in Bucking the Sarge, to the mental sickness in It’s Kind of a Funny Story, to the kidnapping and murder in 33 Snowfish, to vampire mythology in Peeps, this sample set of novels mirrors its field of Young Adult peers by daring to tackle the themes that critics continue to insist belong to the Grownups.

5. The Same Potential for Literary Value as Grownup Novels

In a perfect world, everyone would understand this concept, and a book’s literary value would not be judged solely on the age of its audience. With a careful scan of the canon one can easily notice the numerous books featuring adolescent protagonists—Charles Dickens’ Pip (Philip Pirrip), J.D. Salinger’s Holden Caulfield, Jane Austen’s Elizabeth Bennet, Mark Twain’s Tom Sawyer, Alexandre Dumas’ Philippe, and many more. These are, however, only the books that lasted. Many more did not. Things are not any different now. Some books survive, and most are forgotten, Children’s, Young Adult, and Grownup books alike.

There are, of course, other smaller factors that add to the Young Adult environment—experimental form, technology, social status, self-image, young love, friends, work, and parental units—but these are not, what I consider to be, the crucial elements. For these twelve novels, the term Young Adult serves as both an age demographic and a genre. Sure, it might be a tool used by marketers to put more books in the hands of readers, but that tool is grounded in the reality of the writing itself.

Robert Cormier once said, “I write to affect people. Everything is to affect the reader” (Carroll 106), and that’s what a quality Young Adult novel does. It takes its readers, youth and adult alike, to a place where adolescence lives on, a place where that journey toward identity continues to happen.

Works Cited

Defining the Genre. Volume 35, Number 1. Fall 2007. Young Adult—so many names for such a controversial body of literature. As America's readership continues to shrink, marketing departments scramble for new strategies for getting books into readers' hands. Bookstores have reshuffled their shelves and re-categorized their sections, drawing titles from both Children's and Grownup Fiction (Sadly, “Adult Fiction” doesn't ring the way I wish it could) to create the new Teen, or Young Adult, sections of their stores. As America's readership continues to shrink, marketing departments scramble for new strategies for getting books into readers' hands. Young adult fiction (YA) is a category of fiction written for readers from 12 to 18 years of age. While the genre is targeted to adolescents, approximately half of YA readers are adults.

The subject matter and genres of YA correlate with the age and experience of the protagonist. The genres available in YA are expansive and include most of those found in adult fiction. Common themes related to YA include: friendship, first love, relationships, and identity. Stories that focus on the specific challenges of youth are sometimes referred to as problem novels or coming-of-age novels. Here the incredibly popular Harry Potter books, by J.K. Rowling. In Book 1, a mysterious letter, delivered by the friendly giant Hagrid, wrenches Harry from his dreary, Muggle-ridden existence: We are pleased to inform you that you have been accepted at Hogwarts School of Witchcraft and Wizardry. Of course, Uncle Vernon yells most unpleasantly, I AM NOT PAYING FOR SOME CRACKPOT OLD FOOL TO TEACH HIM MAGIC TRICKS! This magical, gripping, brilliant book a future classic to be sure will leave kids clamoring for Harry Potter and the Chamber of Secrets and Harry Potter and the Prisoner of Azkaban. (Ages 8 to 13). Young Adult / Science Fiction.
